Mormouth Beach, New Jersey
U.S.A.

Dear DX Listener:

Thank you for your reception report of YNOL "Waves of Light" on November 3, 1963, from 9:45 P.M. to 10:05 PM. CST. This letter is confirming and verifying your report. Our QSL Card added to your collection will count as 1247. !Congratulations!

YNOL operates on 828 kcs. with a power of 15,000 watts, using three 3X2500A3 "Eimac" tubes in the final. The antenna is a 305 feet vertical radiator. The transmitter-studio building is located about eight miles southwest of Managua, the capital of Nicaragua. In addition, we have a downtown studio.

We have been on the air since March 8, 1959, and are broadcasting daily from 0600 to 2100 CST in the Spanish language, and from 2100 to 2200 CST in the English language. We trust our programs have been an inspiration to you.

Very sincerely yours,

Francisco M. Doña
President
